

Team #1

John Barela - Back End Developer
Jason Waldrip - iOS Developer

Kelly Shuster - Android Developer
Ryan McDonald - Designer

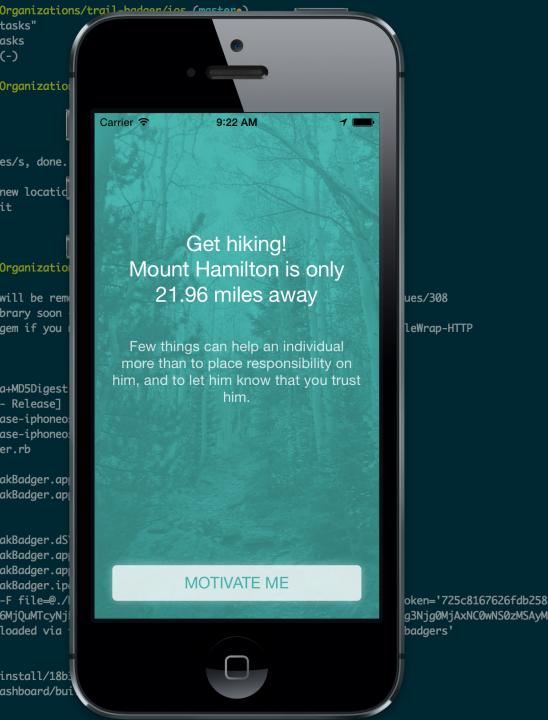

**You could be here!
&
win a badge for it!**

Front End - iOS

A screenshot of an iPhone displaying a mobile application interface. The screen shows a map with a green location marker. Text on the screen reads: "Get hiking! Mount Hamilton is only 21.96 miles away. Few things can help an individual more than to place responsibility on him, and to let him know that you trust him." A "MOTIVATE ME" button is visible at the bottom.

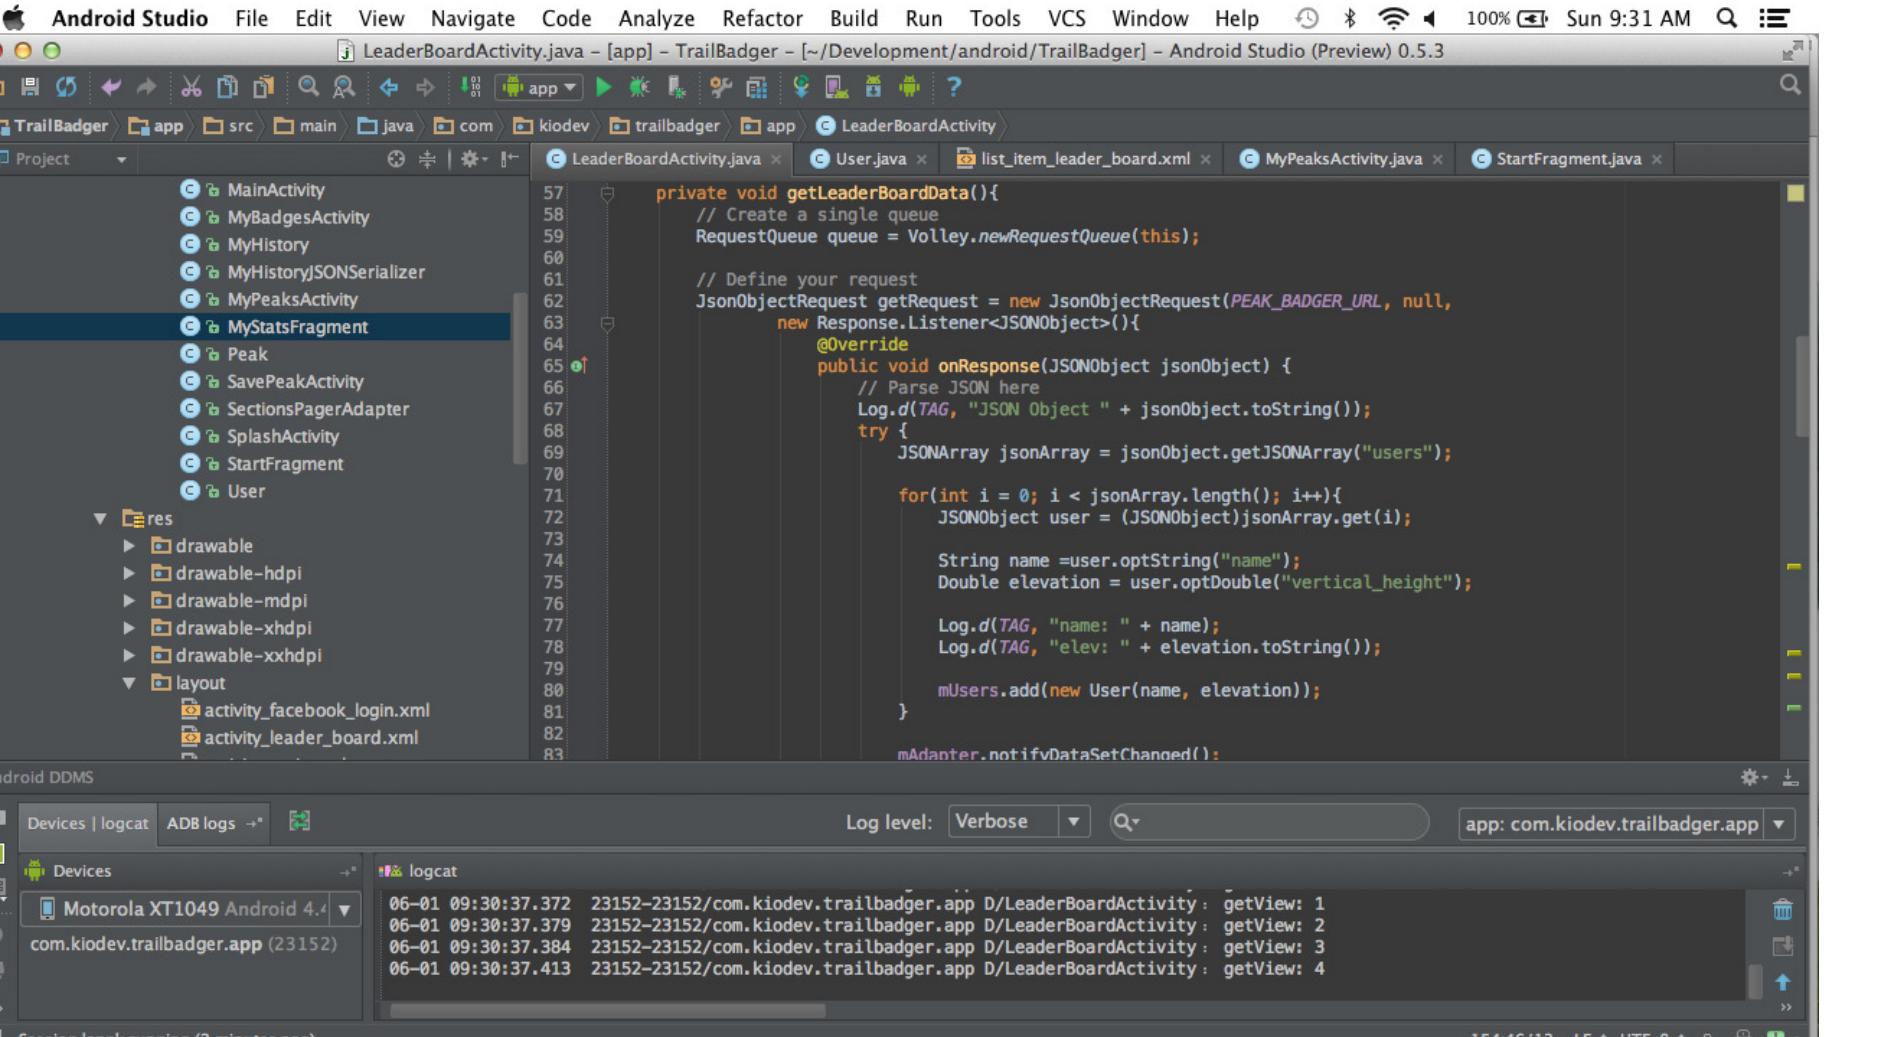

The background shows a file browser window with code files like `tracker.rb`, `nearest_peak.rb`, and `location_helper.rb`. The code includes logic for location tracking and badge creation.

Back End - Ruby

A screenshot of a Mac desktop showing a code editor window for a Ruby project. The file `badges_controller.rb` is open, showing code related to badge creation and user interaction. The code includes methods for creating badges, finding peaks, and updating user data. The desktop also has icons for various applications like Finder, Mail, and Safari.

Front End - Android

A screenshot of the Android Studio IDE showing Java code for an activity named `LeaderBoardActivity`. The code handles network requests to a server to retrieve leader board data. It uses Volley for networking and JSONParser for parsing responses. The code includes logic for adding users to a list and updating a UI fragment.

Graphics - Adobe
